

Language & Culture Summer Course: just what is needed to get you started

From July 5 till August 27, 2021

The CFLE-CIHEAM-IAMM and the INSTITUT AGRO (both certified Qualité FLE and ISO 9001) are joining their forces to organize a Summer course to assist non French speaking students from around the world in improving their mastery of the French language (oral and written) and in discovering French culture.

This immersion and intensive training period aims to promote the integration of students - beginner, intermediate or confirmed (A0 to C1) – into a French school or institution where they will pursue training in engineering, master's degree or PhD.

A language and culture immersion

The **daily practice of oral and written language** is the main strength of the "Language & Culture" program. You can benefit from eighty hours of French per month punctuated by cultural activities.

But that's not all. You will explore and discover the streets and the marvels of the historic center of Montpellier, Sommières ... You will also learn about wine tasting (to be consumed with moderation) and enjoy regional products.

The "Language & Culture Summer Course" offers international students a unique opportunity to be fully immersed in the French culture with its language, habits and customs... including its gastronomy!

The objective is to prepare you to attend your master, engineer or PhD courses in optimal conditions through daily practice of the oral and written language. The intensive program in FLE (French as a Foreign Language) facilitates your integration, both into university life and into everyday life in France.

A tailor-made program

You will have the option of attending the entire course or just a part, depending on your needs and availability. The price for the full summer course (French lessons and cultural activities) is **€ 860 per month**. Tariff does not include accommodation, food and other daily costs (public transport, insurance, leisure, etc.). You can opt to stay close to Montpellier Agro in one of our student accommodations.

So don't wait any longer and register for our Summer Course right now or no later than June 25, 2021
